

CURRENT PRODUCTS model:CSP374

DUAL AES MONITOR

4ch AES level control
 +12dB function
 Channel link
 24bit, 96kHz support
 Built-in high quality D/A converter
 BNC input-output
 Stereo speaker
 Stereo headphone
 Stereo VU meter
 19 inches 1U size

CSP374 is a digital audio attenuator adapting to the AES/EBU format which it is independent, and can control 2 systems developed for studio and editing room use. It is for monitors, and a sure monitor can do it by D/A converter of high quality. +12db is a function to shift and can also revise a level when an input level is low.

"Digital input/output"

The AES input of 2 systems can connect the AES3-id signal which is a BNC connector without conversion host adapter. It also supports SPDIF format.

"VU meter, monitor"

A monitor of high quality allows the D/A converter of the highest grade that CSP374 is up 96kHz that it had built-in. It can confirm the output in monitor switch by '1/2' and '3/4' When it turns on both switches, it is mixed. In this case, even if 6dB falls down, and a gain put a signal of 0VU in both, it does not jump off scale. The indication of the VU meter is the same as a signal monitoring in SP, HP.

"Link"

It links and can control CH3/4 as a master in CH1/2 when it press the link button. It can control the +12dB switch independently even then.

"FS, emphasis"

In CSP374, the sampling frequency is supporting 32kHz 96kHz, but outputs it in through without handling it about a channel status, validity, users Bit, the emphasis by the control only for levels.

"+12dB"

12dB ups at a level simply when it press the +12dB button of CSP374. Maximum attenuation at the positions just before the full ccw is 60dB normally, but in this case the attenuation is 48dB.

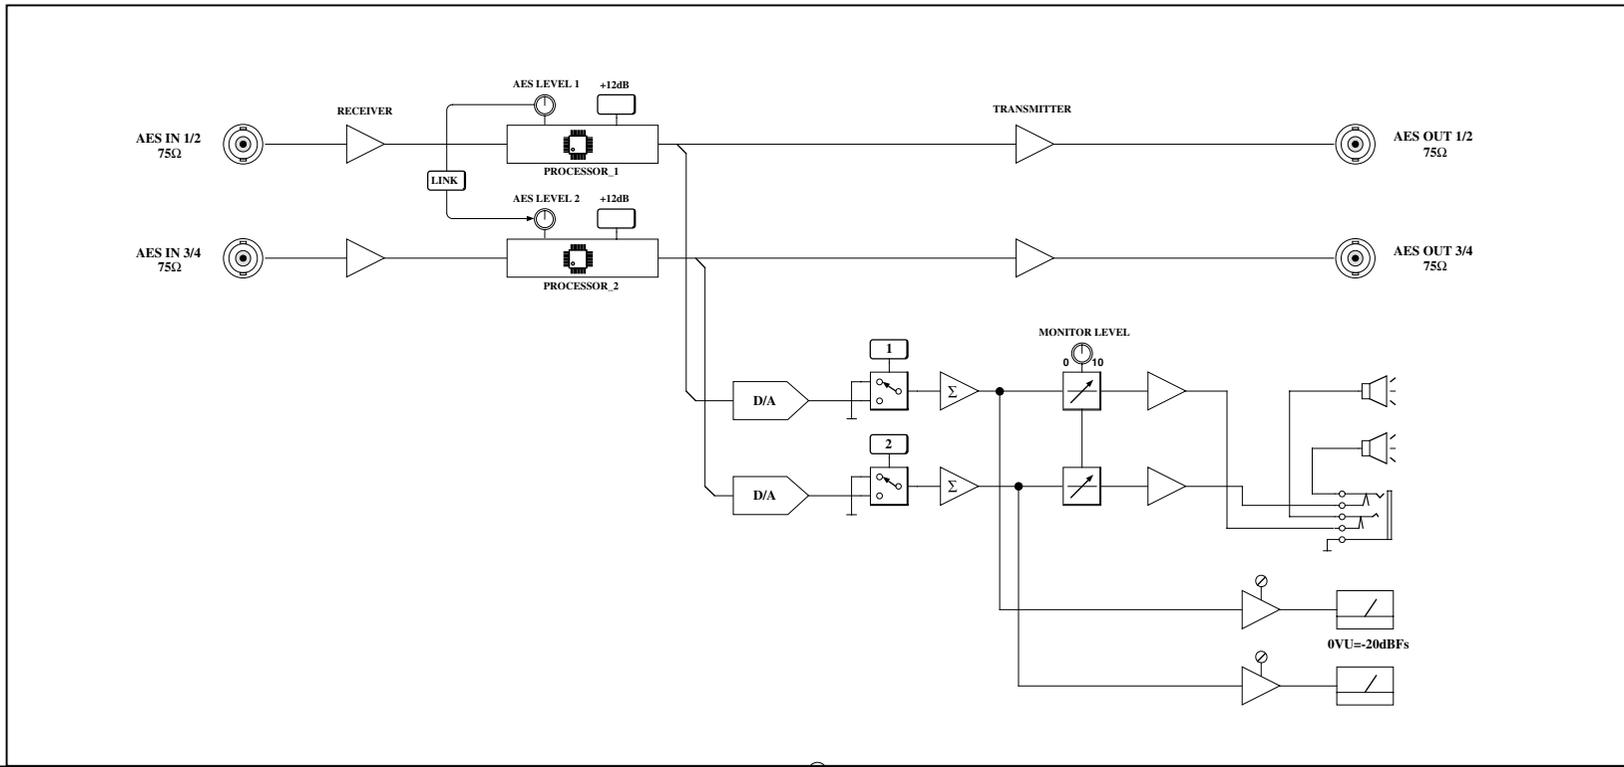

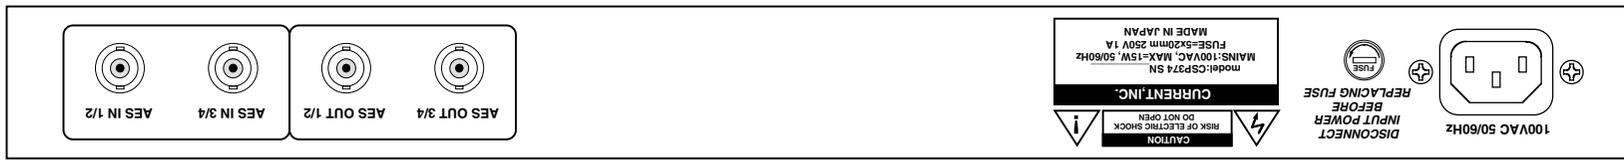

SPECIFICATIONS

- 🍏 CHANNEL: 4
- 🍏 AES/EBU INPUT: UNBALANCED 75Ω BNC, 1V/5V
- 🍏 RESOLUTION: 24bit
- 🍏 SAMPLING RATE: 32kHz to 96kHz
- 🍏 EMPHASIS: NO PROCESSED
- 🍏 VUCP bits: NO PROCESSED
- 🍏 AES/EBU OUTPUT: UNBALANCED 75Ω BNC, 1V/5V
- 🍏 CONTROL +12dB, LINK
- 🍏 LEVEL CONTROL: 0 ~ ∞ 10bit resolution
- 🍏 FREQUENCY RESPONSE: 20Hz-20kHz ±0.1dB
- 🍏 MONITOR: STEREO, SPEAKERS, HEADPHONES 0.5W
- 🍏 THD: < 0.01% at 1kHz REFERENCE LEVEL 16BIT
- 🍏 NOISE: < -90dB
- 🍏 MAINS: 100VAC 50/60Hz MAX=15W
- 🍏 DIMENSIONS: 482Wx444Hx303D 4kg

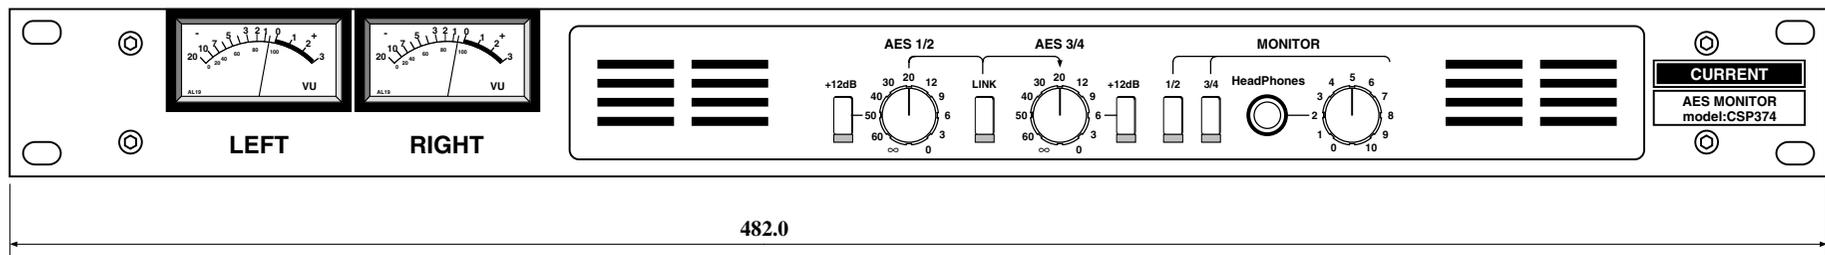

Dual AES Monitor	CSP374	¥640,000
accessory : AC cable

AES Monitor CSP374

AES出力

5V - P P、75Ω仕様です。
出力レベルは内部スイッチで2V-PPに切り替ええます。

AES outputs

5V-PP, 75Ω impedance.
Outputs voltage changeable 2V-PP by internal switches.

AES入力

0.5Vから5V - P Pまで対応します。
入力インピーダンスは75Ω仕様です。

AES inputs

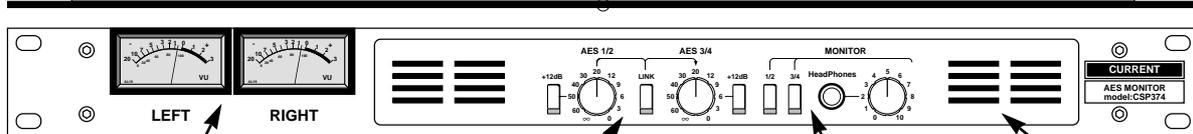

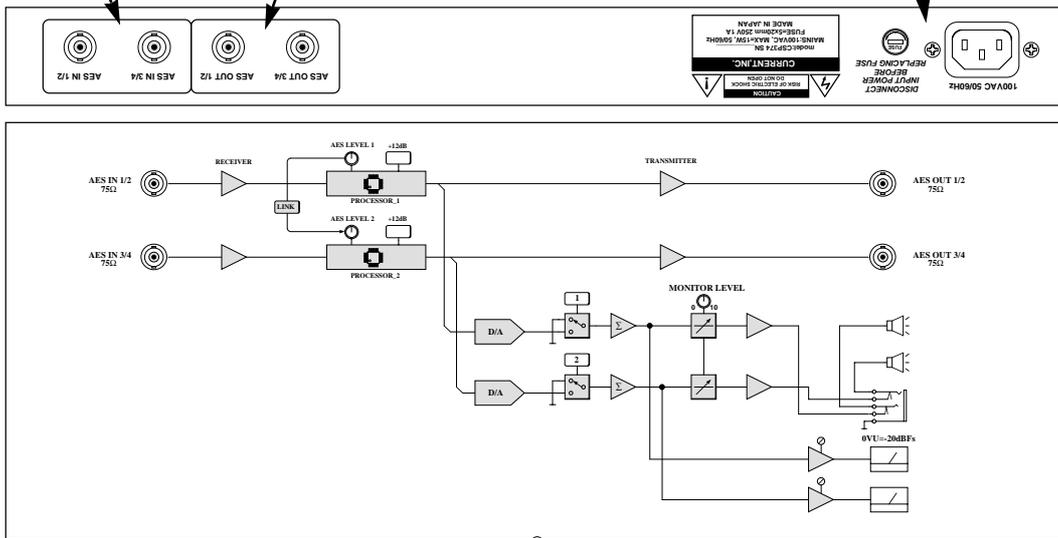

Accept +0.5V to +5V-PP.
Inputs impedance is 75Ω.

AC入力

100、50/60Hzで使用してください。
ヒューズは250V 1Aの5x20mmタイプを使用して下さい。(200~240Vはオプションです。)

MAINS Input

Use it in 100V, 50/60Hz. The fuse is to be inside, and use a type 5x20mm of 250V 1A. (200 - 240V are optional.)

VUメーター
モニターセレクトで選んだソースを表示します。
1と2を両方選択した場合にはミックスした信号を表示します。

VU Meters

The source chosen with monitor selector. The signal mixed when both chose 1 and 2 is selected.

AESレベル1、2

0dBから∞まで連続可変でき、+12dBスイッチでゲインを上げることができます。LINKスイッチをONにするとAES-2はAES-1のつまみでコントロールされます。なお、+12dBスイッチは個別コントロールです。

AES Level 1,2

The AES level can be controlled continuously 0dB to ∞. When the LINK switch is turned on, AES-2 is controlled with the knob of AES-1. And, the +12dB switch is independent control.

モニタースピーカー

Power Indicator

モニター

モニターセレクトで選んだソースをモニターできます。
1と2を両方選択した場合にはミックスされます。
ヘッドフォンを差した場合にはカットされます。

Monitor

The source chosen with the monitor selector. It is mixed when both choose 1 and 2. It is cut when using headphones.
