

CURRENT PRODUCTS model:FU330

SONIC FADER

MIDI fader
 CS10 protocol
 SONIC STUDIO support
 Master fader control
 General fader scale
 At last it is fade with a manual

FU330 is the remote master fader which is compatible with a mixing desk of the SONIC system which is a CD mastering system of SONIC SOLUTION company. It is a task of extreme difficult to fade-out with a mouse in the fader on the screen, but fade-out is enabled for the sense like the SSL console if it uses this fader.

"Control"

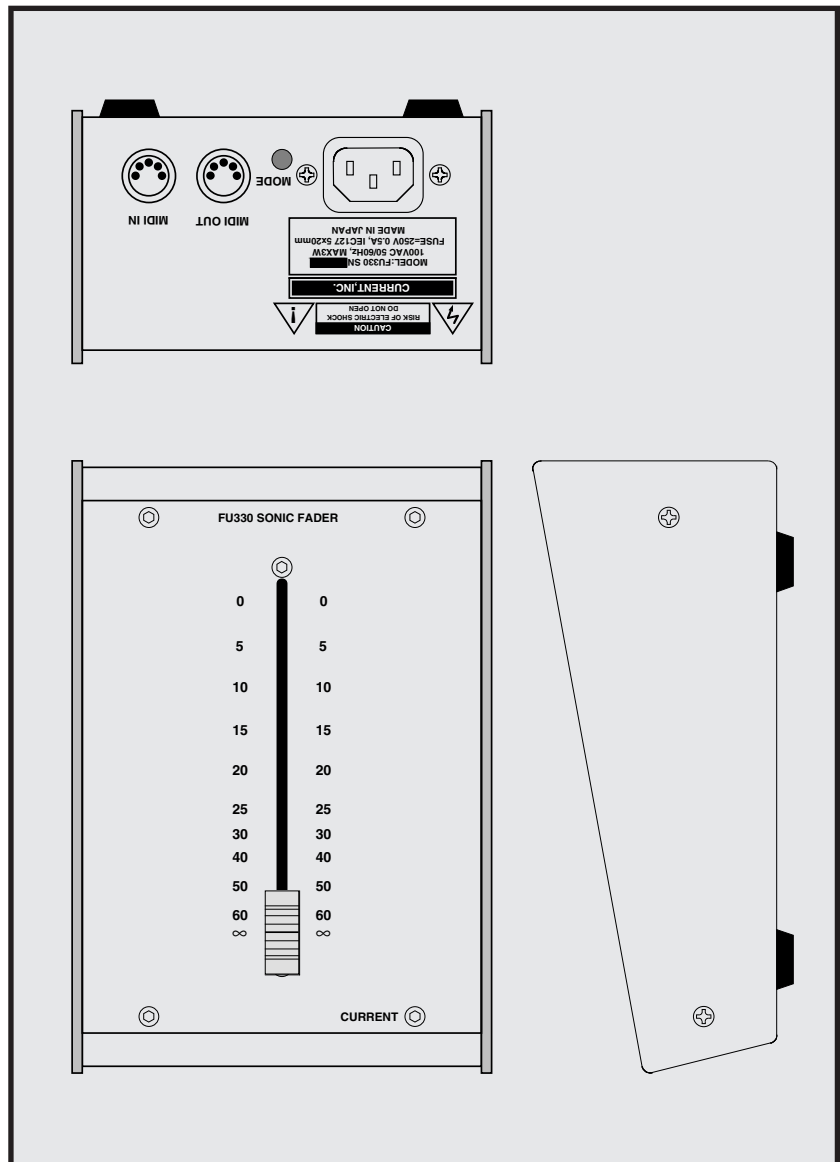

A fader stroke of FU330 is a better 100mm stroke of the operability, and there is smooth level control.

"Interface"

FU330 works in the MIDI which SONIC supports by default. It is really necessary to install Apple MIDI driver which is Apple company standard MIDI driver when it uses it. In addition, in the case of version after 5.3 of SONIC, OMS is indispensable to an MIDI driver.

"Others"

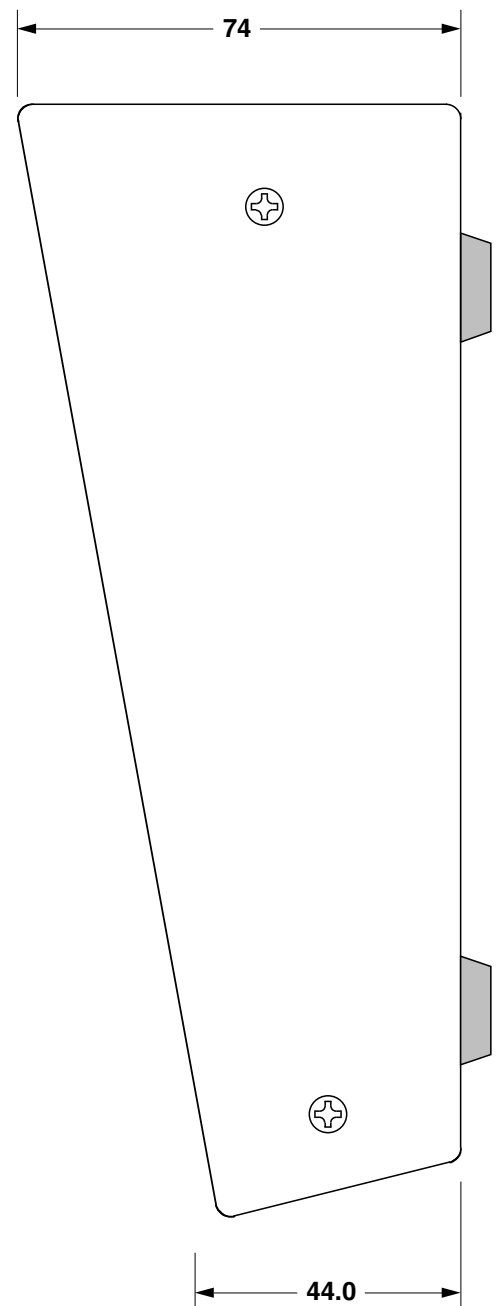

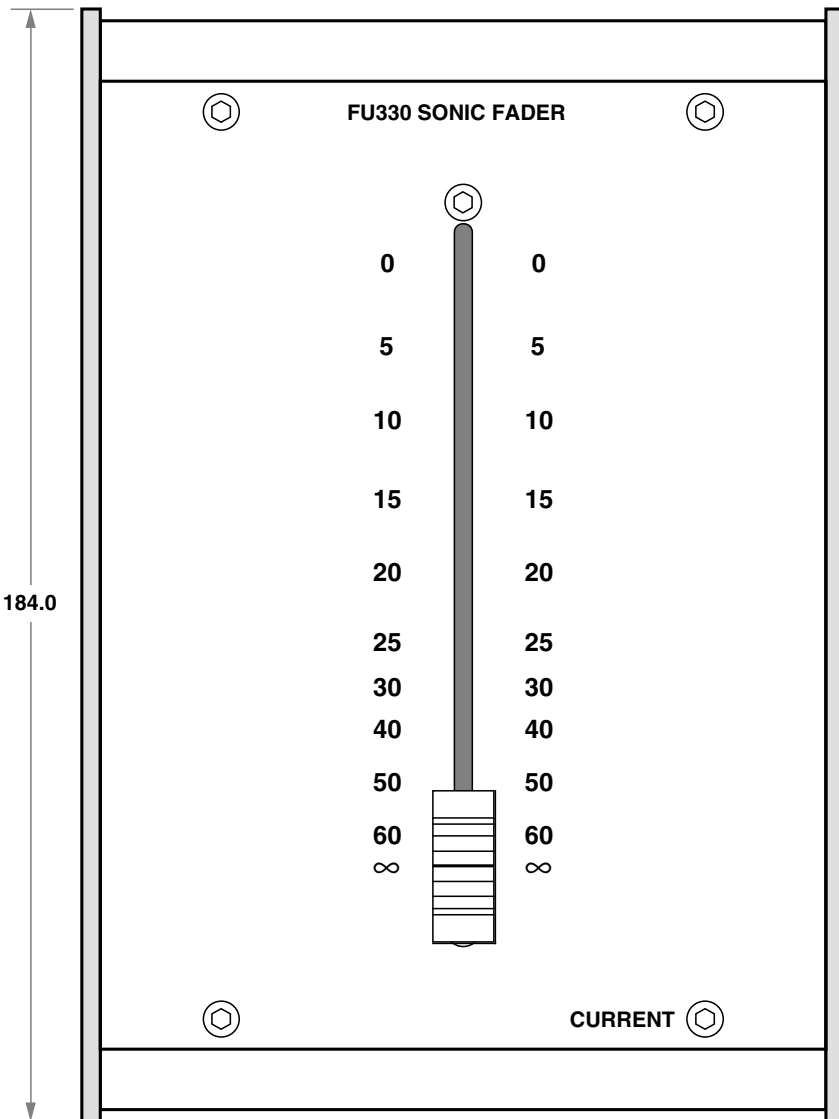

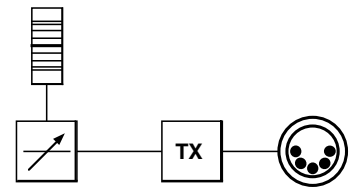

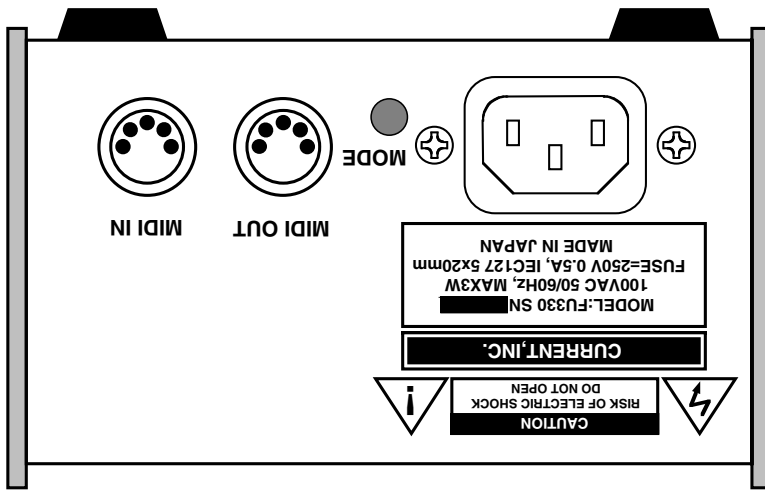

It works in an MIDI protocol, and even other equipment is applicable. Please inquire for the changes of the protocol.
