ONE-TOUCH MIC ADAPTER

One-touch microphone adapter
Easy installation
Solid
5/8 inch mounting screw
Industry standard

MSA10 is the adapter which can make a microphone and the putting on and taking off of the stands in one-touch. When it mounts a microphone in the stands, it inserts a microphone and is OK if it confirms a lock sound called the click. In addition, it can easily release rock when it removes it if it presses the button of the stands side. It is extremely convenient in the scene requiring of quick microphone exchange. In addition, by the rubber gasket of the junction, setting without the backlash is possible at the time of the joining.
