Peak hold
Various display

can change the name to stand out in the backlight of every meter with an option.

The SL578184 series is an LED VU meter module of the 40mm width. Height is 150mm, and SL578184 can indicate a name in the lower meter. SL674184 can indicate a name at 160mm in height in the upper meter. SL674S can indicate REC of the tape recorder, READY tarry at 170mm in height in the upper meter.

"12-point display"

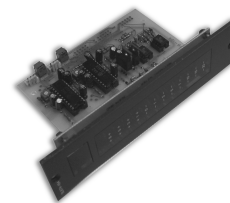

It uses LED of the 12-point for every meter module, and visibility from left and right betters extremely. It indicates it in green from -20dB to 0dB and indicates it with red further.

"Peak hold"

For levels more than 0dB, it can make a peak level hold. It is set in factory for approximately 1 second in a hold time, but can make a variable in a trim in the PCB from 0.2 seconds to 2 seconds. As for the peak hold, hold off and reset are possible by an external switch.

"Others"

It can adjust the brightness of the LED in a trim in the PCB. Additionally, the audio input can support in balance or unbalance. It
